The office is open on weekdays

Layout N9 kubiek

Kubiek is a modestly sized, but well equipped music club. It consists of a concert hall at ground level, and artist accomodation on the first and second floor.

Concert hall

Kubiek concert hall measures 9,80m by 18m. The room can contain a maximal amount of 320 people standing and 180 seated. The stage is set up against the back wall of the room. The stage measurements are 7m x 4,60m. The distance from the stage floor up to the ceiling is 4,5m. Behind the stage, there is some heavy, acoustically absorbing, fireproofed cloth. The stage floor is covered with carpet.

The concert room is fitted with a fixed sound system, that can be operated from a DJ-setup, in the concert room or on stage. Wi-fi is available.

PA-setup

The FOH-control devices are set up centrally in the back of the room, not seperated from the audience.

Next to the stage is a secondary PA-room, with control devices for the monitoring and stage connections.

Parking and loading

Kubiek concert hall is provided with a loading bay. This is accessible by car from the outside, also bigger vehicles (vans, tourbusses) can reach it. Parking is just a 1 minute walk from loading bay. Promotor will advise TM in advance about load-in and parking. Check [this link](#) for a route description.

Electricity

When N9's own PA setup is used, N9 guarantees a separate electrical circuit for backline/instruments (16A / 220V) and lights. N9 can also provide a high-quality 220V-110V convertor (for US amps and instruments).

Safety

N9 kubiek is a non-smoking venue that meets all safety requirements issued by the Belgian government. There are sufficient emergency exits and -lighting plus the concert room is completely soundproofed. Use of non-fireproof stage props, smoke machines, effects, etc. have to be checked with the N9 technical staff in advance.

TECHNICAL INFO

NATIONAL SOUND REGULATIONS
MAXIMUM SOUND LEVEL AT FOH POSITION:
100 dB L_{Aeq} 60 min AND 102 dB L_{Aeq} 15 min

Sound level restrictions can and will be checked by city services at any moment. Any violation of this rule might cause us to lose our license. The venue staff has full authority to intervene when bands don't respect the restrictions. We have 10Eazy measuring software.

FRONT OF HOUSE

FOH mixing desk

Midas M32 digital mixer – latest firmware

Powerconditioner Furman PI-Plus E

CD recorder Tascam CD-RW900

Amplifier / Processor

1 x L-Acoustics LA4X

2 x L-Acoustics LA8

Class D amplification, 96 kHz/32 bit DSP, Ethernet network

Speakers

8 x L-Acoustics KARA line array (4 x left / 4 x right)

6 x L-Acoustics SB18 sub (3 x left / 3 x right – cardio)

In-fill

2 x L-Acoustics ARC Wide top (front truss)

STAGE

Monitor mixing desk

Midas M32 digital mixer – latest firmware

Midas DL32: 32 input / 16 output stagebox

Cat5-cable AZS50 compatible, Ethercon connectors

Powerconditioner Furman PL-Pro DMC E

Monitor speakers

8 x powered wedge Turbosound iQ12 - 2500 Watt

2 x powered sub Turbosound iQ15B – 3000 Watt
